

Stereo Pillow Speaker Set

Thank you for choosing the Marpac Stereo Pillow Speaker Set, model SP-101M. Listening to music or television without disturbing others or using a Marpac sound conditioner for noise masking or to add sound where it might otherwise be too quiet, the SP-101M is an excellent choice for superior sound quality. With proper care and use you should receive much satisfaction from this product.

Important Safeguards:

- Read all instructions.
- Do not sleep with excess slack in the Stereo Pillow Speakers cord. Gather the loose cord and use a twist tie, rubber band, or other fastener to secure excess cord in a tight bundle.
- When possible, route the cord of the SP-101M toward the headboard of your bed. This placement will help keep the cord out of the way if you toss and turn during sleep.
- Do not use with infants. Take special care to keep the cord away from infants.
- Do not use in or around water.
- Do not operate with a damaged cord or if the SP-101M malfunctions or has been damaged in any manner.
- The SP-101M should be situated away from heat sources such as direct sunlight, radiators, heat registers, stoves or other heat-producing appliances.

Stereo Pillow Speaker Set

Use Pillow Speakers:

Your Stereo Pillow Speaker Set can be used with any type or size of pillow.

Please follow these steps to play music or sounds through your Stereo Pillow Speaker Set.

1. Connect the SPEAKER PLUG to the sound output jack on your sound source.
 Note: If you are using a Marpac Sound Conditioner, insert the SPEAKER PLUG into the ACCESSORY JACK on your Marpac Sound Conditioner.
2. Place the Stereo Pillow Speaker Set under your selected pillow. To experience optimum volume, position the speakers with the speaker grills facing up. To experience the best sound quality, position the speakers at opposite ends of your pillow.
3. Adjust the volume and/or balance controls on your sound source to your desired level. You may also adjust the volume with the in-line volume control.

Note: If you cannot hear sound coming from your Stereo Pillow Speaker Set, check to ensure that the SPEAKER PLUG is firmly inserted into the sound output jack on your sound source.
